

## Popup Facebook or Popup Post .

Hi friends,

[ProdeaClub](#) is now coming up with [android application](#) known as [Popup Facebook](#) ,

First Preview for all my friends !!! Please comment on this and let us know your feedback!!!!

Thinking what it is really about, **Pop Facebook** same as pop-up SMS but now this application is for

[Facebook](#) lovers, where you don't have visit

[Facebook](#) to read all your post.

You will get a popup and notification where you can comment, like, dislike, share and other all functionality of

[Faceb](#)

[ook](#)

without visiting the site.

Isn't this amazing?

So friends wait till we release the **Pop Facebook**.

Screen shots would be soon added....

Also share your ideas on what type of features should be included and what is not to be included.

Waiting for your comments...
