

Seeing contact photos in text message threads and conversations is common on services like Viber, Whatsapp, and KIK, as well as the built-in Messages app on Android, but it's not the case with the stock Messages app on iOS. With tight Facebook and Twitter integration for updating contacts (which includes updating their photos), photos in message conversations should have been included by default in iOS 6. You needn't give it a second thought if you're jailbroken, though, as there is a new jailbreak tweak for that! Check it out after the jump.
